Affidavit of Post-Conviction Forensic Expert Analysis

I, Dr. Elsia Moreno, being first duly sworn, hereby depose and state as follows:

Background Information Given to Defense Suppressed at Trial

I reviewed all forensic evidence, including photographs, ballistics reports, and the autopsy file. In my opinion, the prosecution's blood pattern analysis is incomplete and fails to account for post-mortem (after death) movement. There is no conclusive evidence that the victim was shot while on the ground. These findings could support an alternate version of events more consistent with self-defense or accidental discharge.

Client Note:

This expert was never contacted during the trial. Her testimony could have helped my case.
